

First of all, I would like to say that I am a customer of XM radio. I have been for quite a while and have chosen to be a paying customer. There is a reason that I would spend my hard earned money to pay for a service. I obviously am not satisfied with what the "free" broadcasters want me to hear. Therefore I am willing to pay for different service. As long as that remains my free choice to pay for that service, I do not know why I should have censored the information that I am paying for, especially since the local traffic and weather that is being attacked here is not of any "moral" nature. I am in opposition to the bill "NAB's petition 04-160". I think the addition of local traffic and weather is fantastic and XM Radio has done a fine job. The NAB could take a few lessons from XM.
